#Goyal Infotech Security: -

Data Security:

Goyal Infotech will protect the confidentiality of its customers' information, account information and personal communications to the fullest extent possible and consistent with the law and the legitimate interests of Goyal Infotech, its partners, its employees and other customers of Goyal Infotech services. To protect the loss, misuse, and alteration of information that is collected from customers.

Physical Security:

Goyal Infotech takes security very seriously; we ensure a safe and productive Internet environment. Goyal Infotech Hosting actively and automatically monitors all of our systems for attempts at breaching our security or the security of our customers, or attempts to access systems or resources that are not available for customers to use or access. We bring to you a robust network that delivers the speed, reliability and Security you need. A direct connection to multiple Internet backbones from Above net, WorldCom and Quest ensure your site can be accessed quickly from anywhere in the world. Redundant power supplies, standby servers, and 24/7 live monitoring keep your site secure and available. We update all security patches time to time to ensure adequate security. Weekly backups are on Terabyte Backup Server. We have IPF W Firewall protecting your entire network and Black ice Firewall for additional security.

Security Features:

- 24/7 On-Site Security Guards
- Video camera surveillance
- Security breach alarms
- Motion sensors
- State-of-the-art smoke detection
- Fire suppression system

Examples of security actions that will trigger security alarms to our 24 hour / 7 day staffed network operations center are, but are not limited to:

- Satan or port scans, full, half, fin or stealth
- Vulnerability probing of any kind on any machines or devices.
- Ping scans and Ping Floods and ICMP abuses
- SNMP attempts
- Mail host relay use or hi-jacking
- Telnet, FTP, R-commands, etc. to internal systems
- Attempts to access privileged or private TCP or UDP ports
- HTTP access without the use of a Web browser
- Multiple and frequent Finger attempts
- Excessive resource utilization

All information provided in this document is confidential and for internal use only. Copyright © Stores All rights reserved Goyal Infotech:

@Copyright 2012

- Source route spoofing
- Smurf attacks
- IP number spoofing or masquerading
- Forging TCP packets or email header information
- Syn Floods
- OOB attacks
- Password cracking or guessing schemes
- Excessive email postings (SPAM)

**Scope:****Creativity**

The website will be given service industry look and feel with visually appealing images, ease of navigation and flash wherever required. The design will be unique and customized and not just a readymade template as used by most of the website design company. Layout will be presented to the Client for approval before proceeding with other pages.

**Home Page Design**

The most important part of the website is the home page. The homepage needs to be quick & easy to load. More of graphics increase the time for page to open or download. Aesthetic appeal of the design & layout of website attract internet surfers & pursue them to visit the site frequently.

**Navigation**

Navigation must be easy and simple: Visitors hate to go through tens of pages to get their required information's. And so we make sure that the navigation of a page is simple and easy.

**Scalability and updation**

The website developed will be scalable to accommodate changing needs of the organization such as addition of new service or changes in the existing contents. Immediate updation of the website can be undertaken with ease. Information can be made available on your Web site at the time you specify, with all related materials

**Browser Compatibility**

The website design will be compatible with most of the commonly used browser worldwide viz: internet explorer, Firefox, Netscape etc.

<b>Goyal Infotech Cost Sheet</b>	
<b>Cost Component #1</b>	
Web Creation	
Domain + Hosting	Rs.2650 INR Per Year
Web Site Design	Rs. 6500 INR
<b>Total Web Creation Cost</b>	Rs.9,150.00 INR
<b>Duration</b> Corporate Web Site Design	4 Days

**Note:**

The support would be for bug fixing or user queries which would be managed via emails, phones or personal visit as per the request. This would not involve new enhancement or additions. All the content needs to be provided by the customer in a PDF or word format, any copy writing for the contents will have additional charges.

### **☑ Terms and Conditions**
